Standard Features and Characteristics

QUALITY STANDARDS

- The SUPERWATT generator set compliance with all main standards, such as ISO8528 (GB/T2820-97), GB755, BS5000, VDE0530, ISO3046, IEC34-1, CSA22-2, AS1359, ISO14001
- Diesel engine and alternator OEM authorization certificate and their quality assurance.
- Other standards and certifications can be considered on request.

ASSEMBLY

- The engine and alternator are close coupled by means of an SAE flange. A full torsional analysis has been carried out to guarantee no harmful vibration will occur.
- Anti-vibration pads are affixed between engine alternator feet and the baseframe. Thus ensuring complete vibration isolation of the rotating assemblies and enabling the machine to be placed on an uneven surface without any detrimental effects.
- For durability and corrosion resistance, all iron and steel surfaces of canopy fabrications have been treated for coating by grit blast cleaning. Then covered by a polyester powder paint which provides an excellent corrosion resistant surface.

CONTROL SYSTEM AND PROTECTION

- Controllers are available for all applications. The controller system is used to start and stop the engine, indicate electric date and protect the generator set. See controller features inside.
- The revolving parts are covered by safety net, and the place which easy to scald and got an electric shock all to have the obvious warning slogan.

WARRANTY

- SUPERWATT Company provides one-source responsibility for the generator set and accessories.
- Each SUPERWATT generating set has been got through 2 hours load test for running 0%,25%,50%,75%,100% and 110% load, all protective devices and control function are stimulated and checked before dispatch.
- All equipment is guaranteedfor the period of 1000 hours or 12 mouths from the date of commissioning or 18 months from shipping, whichever occurs first.
- Convenience for operation and maintenance, backed by PERKINS, NEWAGE and LEROY SOMER global service network.

RATINGS: All three-phase units are rated at 0.8 power factor. Standby ratings: Standby ratings apply to installations served by a reliable utility source. The standby rating is for this rating. Ratings are in according with ISO-3046/1,BS 5514, AS 2789, and DIN 6271. Prime Power Ratings: Prime power ratings apply to installations where utility power is unavailable or unreliable. At varying load, the number of generator set operating hours is unlimited. A 10% overload capacity is available for one hour in twelve. Ratings are in accordance with ISO-8528/1, overload capacity in accordance with ISO-3046/1,BS 5514, AS 2789, and DIN 6271. For limited running time and base load ratings, consult the factory. The generator set manufacturer reserves the right to change the design or specifications without notice and without any obligation or liability whatsoever. GENERAL GUIDELINES FOR DERATION: Altitude: Derate 2.0% per 300m(984 ft.) elevation above 1000m(3279 ft.) up to a maximum elevation of 2450m(8000 ft.), please contacts with us or our dealer seek the help. Temperature: Derate 6.0% per 11 $^{\circ}$ (20 $^{\circ}$) temperature above 40°C (104 $^{\circ}$).

ALTERNATOR

_			
	Specification		1500RPM 50Hz
	Туре		4-Pole, Rotating Field
	Exciter type		Brushless, Self excited
	Voltage regulator		Solid State, Volts/Hz
	Voltage regulation		≤1.5%
	Insulation		Class H
	Protection		IP23
	Rated power factor		0.8
	Stator winding		Double layer concentric
	Winding pitch		Two thirds
	Winding leads		12
	Maximum overspeed		2250 Rev/min
	Sustained short circuit		Self excited machines do not sustain a short circuit current
	Waveform distortion		No load < 1.5%
		Non-distortin	g balanced linearload < 5.0%
	Altitude		≤1000 m

- Alternators meet the requirement of BS EN60034 and the relevant section of other international standards such as BS5000, VDE 0530, NEMA MG1-32, IEC34, CSAC22.2-100, As1359, and other standards and certifications can be considered on request.
- The 2/3 pitch design avoids excessive neutral currents. With the 2/3 pitch and carefully selected pole and tooth designs, ensures very low waveform distortion.
- Brushless alternator with brushless pilot exciter for excellent load response.
- The insulation system is class H, easy paralleling with mains or other generators, standard 2/3 pitch stator windings avoid excessive neutral currents.

1500RPM 50Hz

Backed by worldwide service network.

DIESEL ENGINE

 2506C-E15TAG2 diesel engines are manufactured by Perkins Engines Company Limited(UK).

Application Data

Engine Specifications	1500RPM 50Hz
Manufacturer	PERKINS(UK)
Number of cylinders	6
Cylinder arrangement	Vertical in-line
Cycle	4 stroke, compressionignition
Induction system	Turbocharged and air-toair charge cooled
Compression ratio	16:1
Bore	137 mm (5.39in)
Stroke	171mm (6.73 in)
Cubic capacity	15.2litres(927 ln³)
Direction of rotation A	Anti-clockwise viewed on flywheel
Firing order	1, 5, 3, 6, 2, 4
Max.Power at rated rpm	451KW(605BHP)
Estimated total weight(dry)	1633kg (3600 lb)
Frequency regulation steady sta	te $\pm 0.25\%$
Frequency	Fixed
Mean piston speed	8.0 m/s
Combustion air flow	37 m³/min
Exhaust	
Exhaust System	1500RPM 50Hz
Maximum back pressure	6.8 kPa
Exhaust outlet size	150mm
Exhaust gas flow (max)	98 m³/min
Exhaust gas temperature (max) 550℃(1022℉)
Lubrication	
Lubrication system	1500RPM 50Hz
Totalsystem	62litres
Sump minimum	45litres
Relief valve opens	610kPa
Normal oil temperature	95℃(203°F)

Application Data

Cooling System	
Radiator	1500RPM 50Hz
Face area	1.283m²
Rows and materials	2 rows, Aluminium
Fins per inchand material	12 fins perinch, Aluminium
Width of matrix	1048 mm
Height of matrix	1100mm
Pressure cap setting	69kPa
Fan	50Hz
Diameter	927 mm
Drive ratio	0.92:1
Number of blades	9
Material	Plastic
Туре	Pusher
Coolant	50Hz
Total system capacity	
with radiator	58 litres
without radiator	12.8 litres
Drain down capacity	TBA litres
Maximum top tank temperature	107 ℃
Maximum permissible restriction to coolant pumpflow	30kPa
Thermostat operation range	88 - 98°C (190.4 - 208.4°F)
Recommended coolant:	

50% ethylene glycol with a corrosion inhibitor (BS 6580 :1992 or ASTM D3306-89 or AS2108)

and 50% cleanfresh water.

CONTROLLERS

DSE 702 MANUAL CONTROLLER(Standard)

The controller made in UK **DEEPSEA** genset controller

Control panel for open

The Model 702 is a Manual Engine Control Module designed to control the engine via a key switch and pushbuttons on the front panel. The module is used to start and stop the engine and indicate fault conditions, automatically shutting down the engine and indicating the engine failure by LED, giving true, first up fault annunciation.

Panel introduction:

- Indicator type frequency, voltmeter and ampere meter demonstration unit's electrical parameter.
- The voltage change-overswitch and the rheotrope uses for to choose the different phase voltage and current to display.
- The big red button uses for the operator to stop the genset peremptorily.
- The oil pressure gauge, coolant temperature gauge and the battery voltage gauge.
- The controller. And an integral anti-tamper LCD hours run counter is also provided.
- If the customerneeds to use the preheating function, we will be able to increase the preheating button.

Protection:

Low Oil Pressure High Engine Temperature Auxiliary Shutdown Over speed

DC Supply: 8 to 35 V Continuous.

DSE 704 AMF CONTROLLER(Optional)

The controller made in UK **DEEPSEA genset controller**

Control panel for soundproof

The DSE704 is an Automatic Mains Failure module with generator monitoring, protection and start facilities. It utilises advanced surface mount construction techniques to provide a compact yet highly specified module. This model can start the unit automatically when the MAINS failure and than control the ATS turn to the genset side. Operation of the module is via three pushbuttons mounted on the front panel with STOP, MANUAL and AUTO positions.

Panel introduction:

- Indicator type frequency, voltmeter and ampere meter demonstration unit's electrical parameter.
- The voltage change-overswitch and therheotrope uses for to choose the different phase voltage and current to display.
- The oil pressure gauge, coolant temperature gauge and the battery voltage gauge.
- The controller.
- Preheating button.

Protection:

Over Speed Shutdown. Low Oil Pressure Shutdown. High Engine Temp Shutdown. Charger failure alarm. Mains failure alarm. Optional Under speed Protection.

DC Supply: 8 to 35 V Continuous.

DSE7320 AMF CONTROLLER(Optional)

The controller made in UK **DEEPSEA** genset controller

Control panel for soundproof

The DSE7320 is an Automatic Mains Failure module with generator monitoring, protection and start facilities. The controller has a large LCD screen, display the generator's each parameter, running and alarm information. The off/replacement button, mode switch button , start/stop button and the LED indicator light, makes the user easy to operate and maintain the generator.

Panel introduction:

- Indicator or digital type frequency, voltmeter and ampere meter demonstration unit's electrical parameter.
- The big redbutton uses for the operator to stop the genset peremptorily.
- The controller.

- Communication: RS232 connection, uses the industry rank MODBUS protocol can easily communicate with others intelligence control system.
- Display function: LCD screen can display the generator's parameter and the control system's running information.
- Set up parameter: Engineer can setup the controller parameter from the control panel or through the PC, 6 programmable fan-out may satisfy the user each kind of demand.
- Protection: The control system can protect the generator set, manage each kind of electrical failure.
- Control Function of ATS.

DC Supply: 8 to 35 V Continuous.
